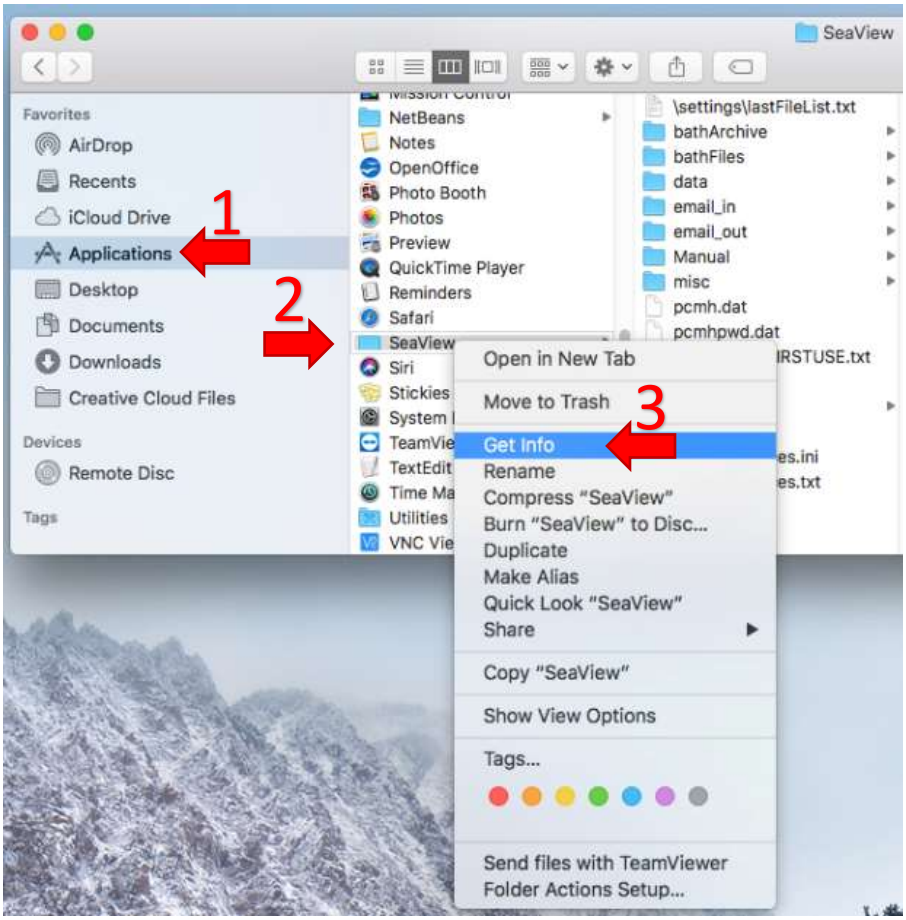
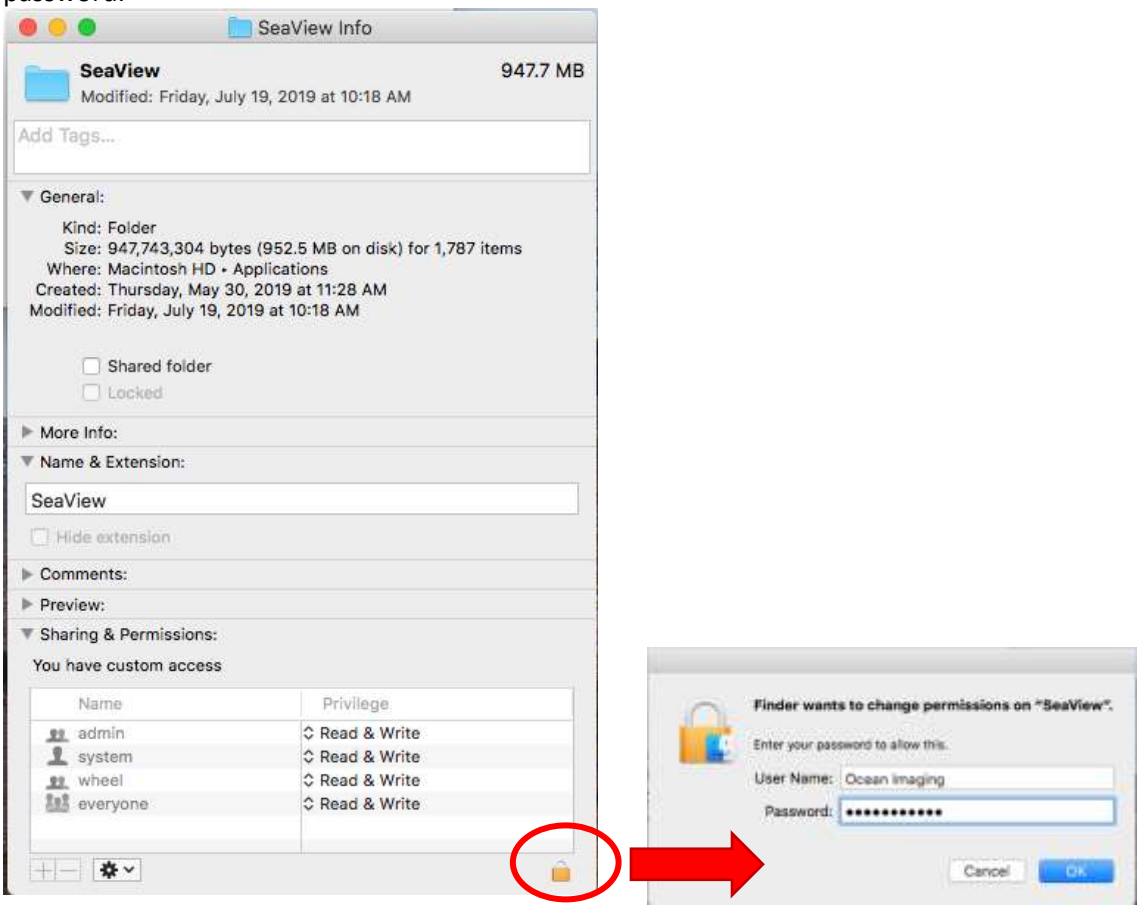
Step 3: Set Administrator Permissions **Essential to run SeaView**

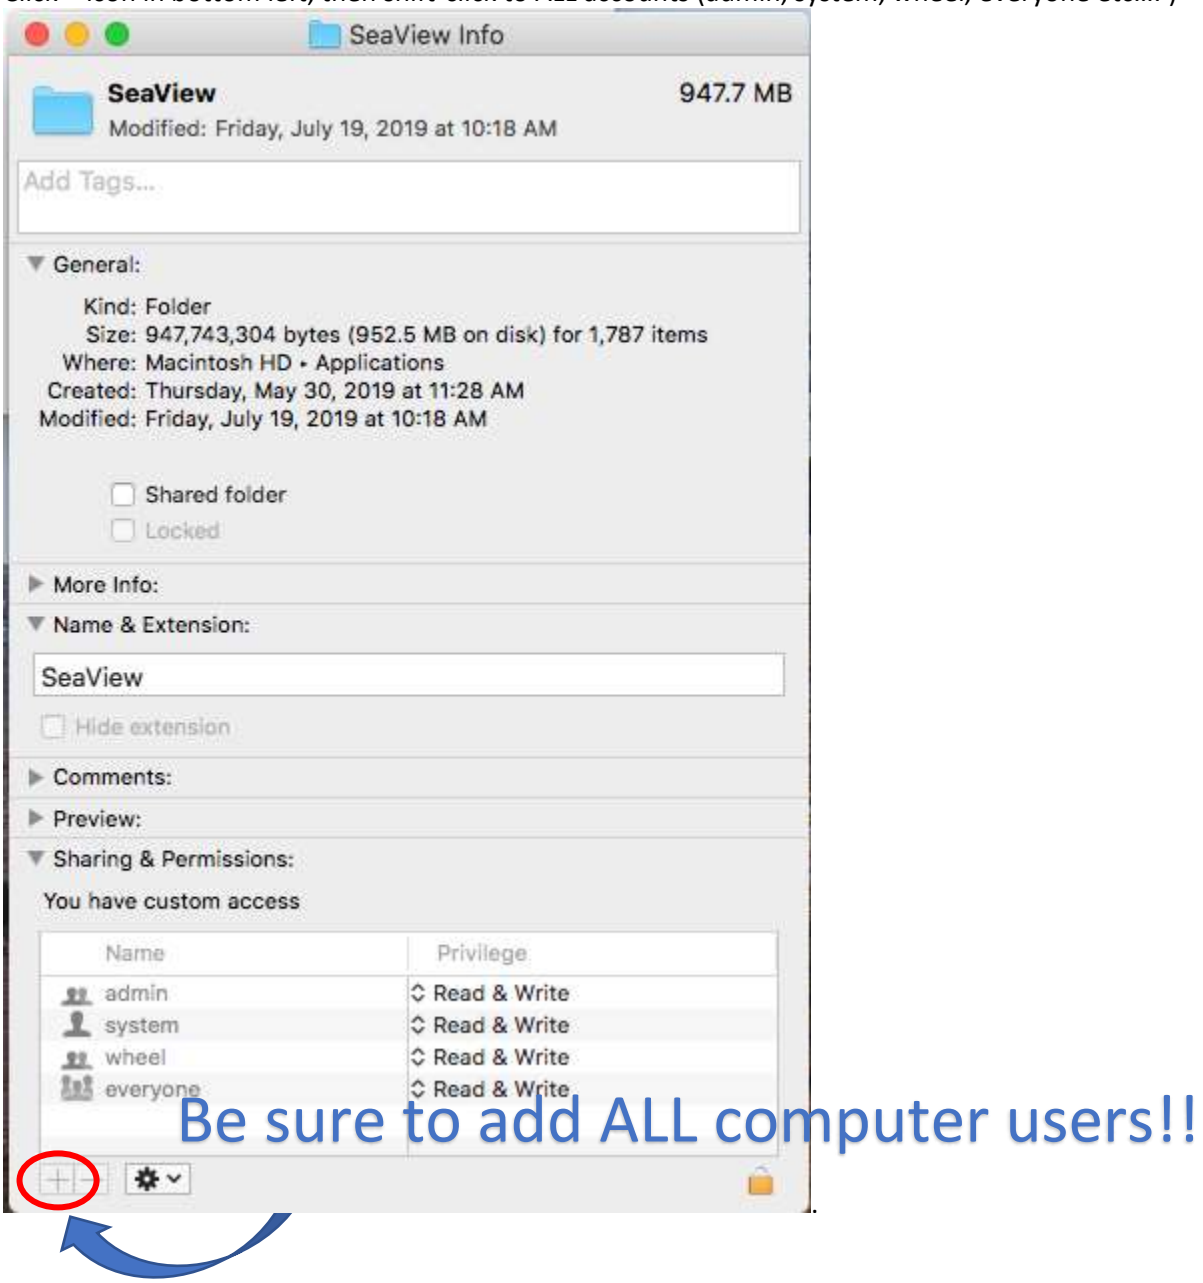
- Within **Applications (1)**, locate **the SeaView (2)** folder - Control-Click or Right-Click (if enabled) **SeaView (2)** folder then select **Get Info (3)**:



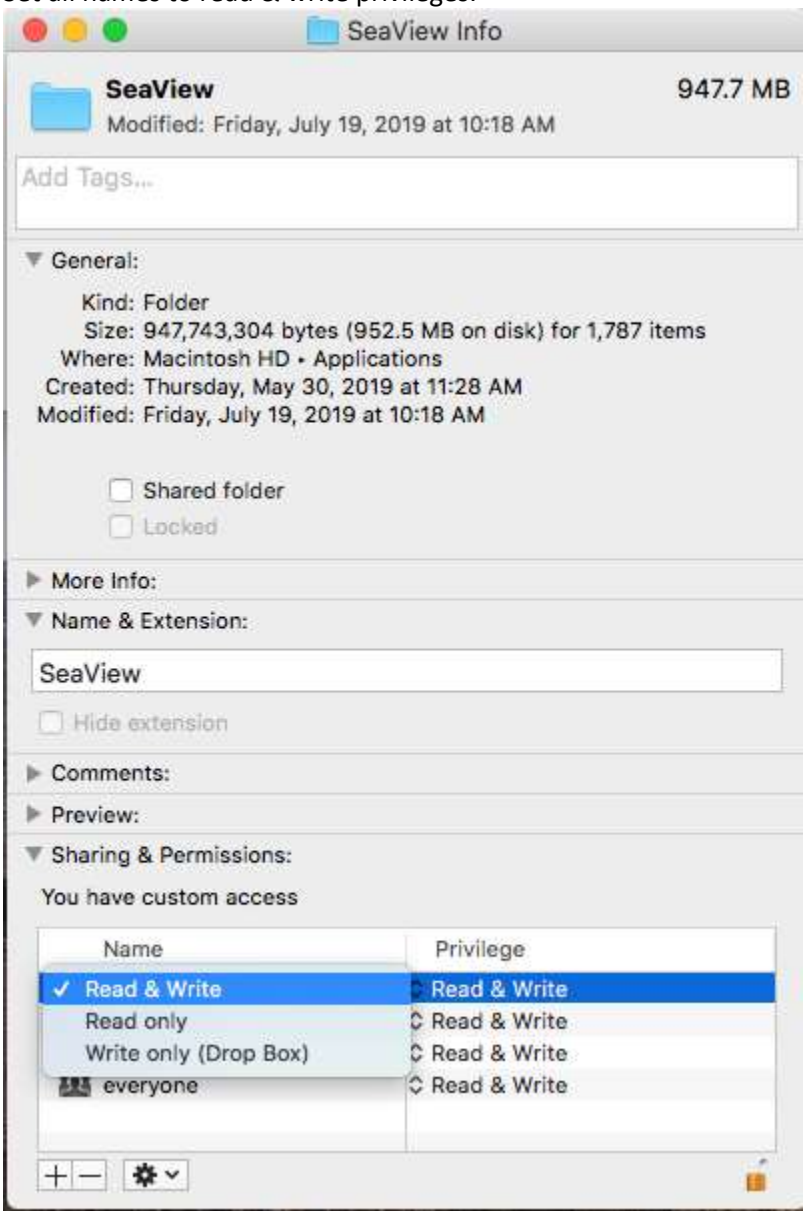
Click lock icon in bottom right to set permissions, you will be asked to enter your MasOS system password.



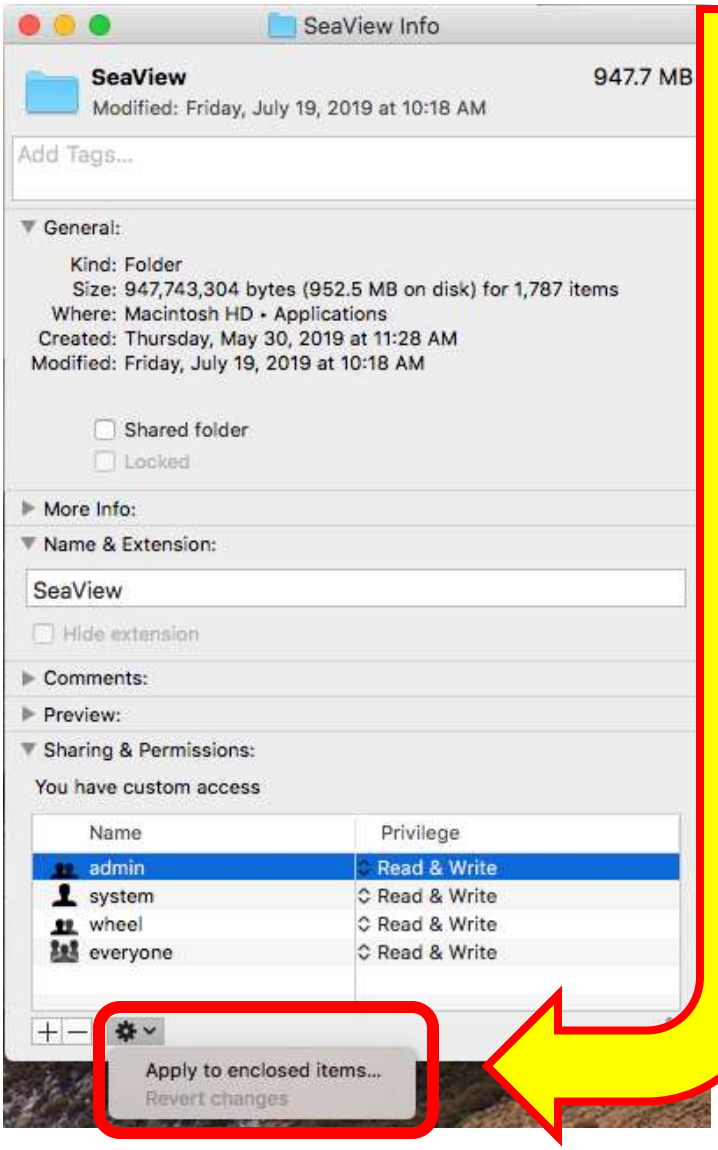
Click + icon in bottom left, then shift-click to ALL accounts (admin, system, wheel, everyone etc….)



Set all names to read & write privileges.



Click settings icon next to + icon.



Important!!

You MUST click on the gear icon and "Apply to Enclosed Items" before continuing. If you do not do this – SeaView will not work.

Do not skip this step!

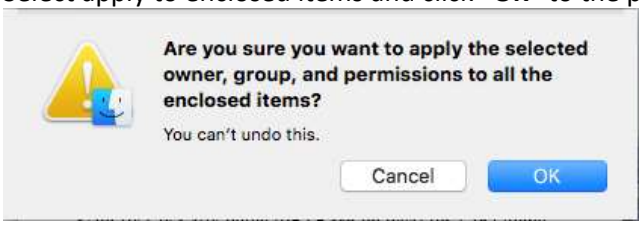
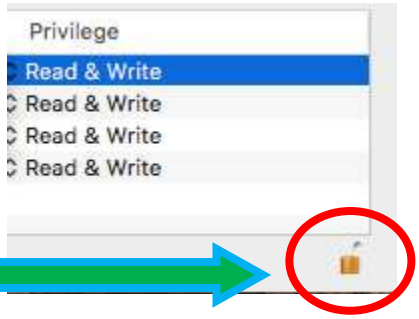
Select apply to enclosed items and click **"OK"** to the pop-up.





Once you have made these configurations, **click the "Lock" icon** again to save the changes.
Then, proceed to registering the software, and send us the code.
NOTE: If you already registered SeaView, you will have to register again now that the settings are correct.
